

Intelligent Security

Begin every day with confidence

Intelligent Security from Logicalis delivers a proactive security framework that will detect, respond and prevent cyber attacks.

We understand the delicate balance that comes with being a CIO. Every decision you make is a choice between upside and risk. Let us tip the scales in your favour with Intelligent Security to help you make intelligent decisions with a blueprint for success.

The benefits of Intelligent Security

Intelligent Security from Logicalis has been designed to give customers the most comprehensive protection available, benefits include:

Enhanced observability

Across networks, cloud infrastructure and endpoints to quickly detect vulnerabilities. If you can see it, you can secure it.

Secure governance

Ensure your people, processes and technology are set up to meet compliance needs.

Rapid response to threats

We deliver 24x7 automated / human identification and response through our SOC, for rapid prevention and remediation of threats.

AI ready

Implement the right Security Blueprint to prepare for and unlock the power of emerging technologies such as AI.

The Intelligent Security Blueprint

The **Logicalis Intelligent Security Blueprint** offers comprehensive guidance for navigating today's complex security landscape.

By integrating security across an organisation's infrastructure, from network to data and identity, Logicalis ensures a cohesive and robust defence strategy. The blueprint covers essential pillars, including **Advisory** for GRC consultancy, **Secure Solutions** for Secure Workplace for safeguarding communications and devices, Secure Connectivity for protecting the network, Secure Hybrid Cloud for managing data across environments, and Secure Operations for Cyber Threat Intelligence and SOC services.

With Logicalis as your strategic security partner, gain the tools and expertise needed to safeguard your organisation and strengthen your security posture, so you can begin every day with confidence.

How we get you there

We help you along the journey towards achieving Intelligent Security - with speed and efficiency, using our tried and tested methodology.

Align

Initiating with one of our Intelligent Security assessments is the best way to start. We meticulously evaluate your existing environment, pinpoint potential security gaps and risks that may expose you to cyber threats. Additionally, we provide specialised assessments tailored to specific areas, as well as training for your team on security topics like Phishing.

Transform

Our global/local professional services teams offer a diverse array of solutions to enhance your organisation's security posture. These solutions encompass connectivity, hybrid cloud environments, device management, and more, all derived from the Intelligent Security blueprint.

Scale

Empower your IT team to concentrate on mission-critical initiatives by opting for Logicalis' Managed Intelligent Security services. Allow the Logicalis SOC team to vigilantly oversee your environment, swiftly identify and address threats, and proactively seek out vulnerabilities to stop attacks before they occur.

Begin every day with confidence.

Innovate and advance. Be where you want to be, following an Intelligent Security blueprint for success with Logicalis by your side.
